

For Immediate Release

Liber8Now Preparing for Manufacturing at Scale *GSR8 Gunshot Detection Undergoing Optimization*

May 21, 2025

Atlanta, Georgia. Liber8Now, Inc. disclosed today that the company has made the decision to forego additional manufacturing and deliveries of the recently released GSR8 gunshot detection solution to allow the product to undergo optimization. The optimization process is expected to provide industry-leading device reliability while also enabling the company to begin manufacturing a high quality product at scale.

Todd Cripe, Liber8Now CEO, stated: “We and our customers are very happy with the performance of the GSR8 v1.0 that we released in 1Q2025. We could continue selling and installing the product as is, but we elected to have some additional eyes review the current product before we start manufacturing at scale. Based on what we’ve seen so far, a few recommended changes will make the GSR8 more manufacturing-friendly while providing bulletproof reliability.”

Kuldip Pabla, CTO of Liber8Now, added: “Our goal is to complete the optimization process this summer and begin delivering the next release of the GSR8 in Q4 2025. This version will undergo the same rigorous testing process that helped us set a new standard in accuracy last year. Our commitment remains clear: delivering a solution that reliably distinguishes true gunshot events from everyday noises like fireworks or construction—giving our customers the fastest, most accurate response capabilities available.”

About Liber8Now: Liber8Now, Inc. is a Delaware Corporation headquartered in Atlanta, Georgia. We provide innovative and effective solutions that increase the likelihood of surviving an active shooter incident.
