

**For Immediate Release**

## **Liber8Now and Janus Advisory Group Deploy GSR8** *Gunshot Detection Solution Safeguarding VA Hospital Patients and Staff*

**May 1, 2025**

**Atlanta, GA and Alexandria, VA.** Liber8Now, Inc. and JanusAG (Janus Advisory Group) announced today that JanusAG has successfully deployed the innovative GSR8 gunshot detection solution at a VA hospital. The installed configuration provides multiple GSR8 devices strategically placed in key areas of the facility.

Todd Cripe, Liber8Now CEO, stated: “We are fortunate to have a strategic partner like JanusAG and their VA Hospital customer that were very patient with us as we went through the comprehensive testing and validation process for our GSR8 **Gun Shot Response** detection solution. We had consensus from all three parties that it was essential for the GSR8 to function properly and reliably prior to deployment. After many months of testing and multiple iterations of firmware and software, we delivered a gunshot detection device that performs as promised.”

Andy Jones, JanusAG President, stated: “When we learned that Liber8Now was developing an innovative gunshot detection solution that featured a dry contact notification option, we felt the product had great potential. We made the decision to wait for them to get it right and appreciate company leadership’s transparency in sharing regular updates for how the project was progressing. The end result is that we have a happy customer and look forward to a long, mutually beneficial relationship with Liber8Now.”
