

For Immediate Release

Liber8Now Releases GSR8 V1.0 Gunshot Detection Solution

Deployments Begin in April 2025

March 31, 2025

Atlanta, Georgia. Liber8Now, Inc. announced today that the company has released Version 1.0 of their GSR8 gunshot detection solution. The product has been in development since mid-2024.

Todd Cripe, Liber8Now CEO, stated: “Our market research indicated that there was a need for an innovative gunshot detection solution that reliably detected actual gunshots but did not falsely identify loud noises such as jackhammers or popping plastic bags as gunshots. To assure product market fit, we produced a comprehensive set of testing criteria that we felt was essential for our GSR8 device to pass prior to releasing this mission-critical solution. After many months of development, testing, and iteration, we have crossed the finish line.”

Kuldip Pabla, CTO, stated: “We were able to assemble a talented development team comprised of Liber8Now resources and “work for hire” contractors that collaborated to create the most advanced gunshot detection solution available. We decided at the onset of the project that GSR8 device performance goals would be set at a level that would be what we believe is the highest in the safety and security industry. The result of our efforts is that we have created a better solution than what was previously available.”

CEO Cripe added: “Word travels fast in the tightknit security and safety segment, so we are very excited about the response we have received from prospective End Users, Systems Integrators, Vendor Partners, and Investors. The future for Liber8Now is very bright.”

About Liber8Now: Liber8Now, Inc. is a Delaware Corporation headquartered in Atlanta, Georgia.
